PROFILE SUMMARY

Front-End Developer skilled in building responsive, user-friendly web interfaces using HTML, CSS, and JavaScript, with strong UI/UX and web design knowledge. Focused on performance, accessibility, and clean user experiences.

EXPERIENCE

EduSkills - Java Full Stack Developer Virtual Internship

Jul 2025 - Sep 2025

- Completed a 10-week virtual internship program focused on full-stack application development, supported by AICTE and EduSkills Academy.
- Gained exposure to full stack development concepts alongside core frontend development work.
- Explored frontend, backend, database, and application development fundamentals through structured learning and practical exercises.

CODSOFT - Web Development Intern

Dec 2024 - Jan 2025

- Built 3 responsive frontend web applications using HTML, CSS, and JavaScript: a music player, portfolio website, and calculator application.
- Applied responsive design principles across 3 web projects to improve usability on different screen sizes.
- Strengthened skills in frontend development, debugging, code organization, and Git/GitHub workflow.
- Completed multiple project-based assignments during the internship, applying frontend concepts from interface structure and styling to interactive functionality and responsive implementation.

PROJECTS

NEX | SECURE FILE MANAGEMENT PRODUCT INTERFACE

- Designed and Refined 2 role-based dashboard experiences for administrators and IAM users, covering 7 core areas: user management, access control, files, departments, audit activity, alerts, and licensing workflows.
- Created consistent UI patterns across 2 dashboard experiences, focusing on responsive layouts, visual hierarchy, reusable components, and usability.
- Redesigned 4 key interface workflows: activation serial generation, table/grid views, action menus, and dashboard navigation.

NEBULASAFETECH | MULTI-PAGE TECHNOLOGY WEBSITE

- Built and structured a responsive 7-page website covering Home, About, Services, Clients, Edutech, Product, and Contact.
- Implemented 7 technical SEO improvements, including sitemap.xml, robots.txt, unique page titles, meta descriptions, social sharing metadata, image alt text, and a custom 404 page.

PERSONAL PORTFOLIO | DEVELOPER PORTFOLIO WEBSITE

- Created a responsive personal portfolio showcasing 4+ frontend, UI/UX, and web projects.
- Implemented responsive layouts, project case studies, SEO fundamentals, and optimized interactive animations to balance visual presentation with website performance.
